Pan's Travail Johnson Donald Hughes 1994 "Many people express surprise," writes J. Donald Hughes, "when they are told that environmental problems existed in the ancient world; they are used to thinking of the environment as an exclusively modern concern. But an examination of the evidence shows that the Greeks and Romans not only suffered from some of the same predicaments that plague the present scene, but in many cases they were aware of them and commented on them." "In Pan's Travail Hughes examines the environmental history of the classical period and argues that the decline of ancient civilizations resulted in part from exploitation of the natural world. Focusing on Greece and Rome, as well as on areas subject to their influences, Hughes offers a detailed look at the impact of humans and their technologies on the ecology of the Mediterranean basin. He explores the complex relationships of human culture and the environment with topics that include deforestation and overgrazing, soil erosion, depletion of wildlife and natural resources, pollution, and urban problems such as water supply and sewage disposal. He also compares the ancient world's environmental problems to those of other eras and discusses attitudes toward nature expressed in Greek and Latin literature."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Culture in Clinical Care Bette Bonder 2002 Defines and describes culture and its interaction with individual experience and personality in the development of beliefs, values, and actions. Information about cultural beliefs related to health and wellness are explored as they affect intervention strategies. Based on ethnographic methods, mechanisms for culturally sensitive assessment and intervention are considered. The text goes beyond traditional fact-centered approaches, taking the perspective that culture is emergent in individuals as they interact with the physical and social environment. The book fills a niche in the health professions programs because of its theoretical approach, its emphasis on strategies and methods for clinical interventions, and its importance of strategies for practice and self-assessment.

Bible Readers and Lay Writers in Early Modern England Kate Narveson 2016-04-15 Bible Readers and Lay Writers in Early Modern England studies how immersion in the Bible among layfolk gave rise to a non-professional writing culture, one of the first instances of ordinary people taking up the pen as part of their daily lives. Kate Narveson examines the development of the culture, looking at the close connection between reading and writing practices, the influence of gender, and the habit of applying Scripture to personal experience. She explores too the tensions that arose between lay and clergy as layfolk embraced not just the chance to read Scripture but the opportunity to create a written record of their ideas and experiences, acquiring a new control over their spiritual self-definition and a new mode of gaining status in domestic and communal circles. Based on a study of print and manuscript sources from 1580 to 1660, this book begins by analyzing how lay people were taught to read Scripture both through explicit clerical instruction in techniques such as note-taking and collation, and through indirect means such as exposure to sermons, and then how they adapted those techniques to create their own devotional writing. The first part of the book concludes with case studies of three ordinary lay people, Anne Venn, Nehemiah Wallington, and Richard Willis. The second half of the study turns to the question of how gender registers in this lay scripturalist writing, offering extended attention to the little-studied meditations of Grace, Lady Mildmay. Narveson concludes by arguing that by mid-century, despite clerical anxiety, writing was central to lay engagement with Scripture and had moved the center of religious experience beyond the church walls.
