A vicious serial killer is on the loose and the victims have one thing in common: they are all high-profile executives in the managed care industry. Dr. Will Grant is an overworked and highly dedicated surgeon. He has experienced firsthand the outrages of a system that cares more about the bottom line than about the life-and-death issues of patients. As a member of the Hippocrates Society, Will seeks to reclaim the profession of medicine from the hundreds of companies profiting wildly by controlling the decisions that affect the delivery of care. But the doctor's determination has attracted a dangerous zealot who will stop at nothing to make Will his ally. Soon Will is both a suspect and a victim, a pawn in a deadly endgame. Then, in one horrible moment, Will's professional and personal worlds are destroyed and his very life placed in peril. To save her career, she has no choice but to risk trusting Will, knowing he may well be the killer she is hunting. Together they have little to go on except the knowledge that the assassin is vengeful, cunning, ruthless—and may not be working alone. victims.

Vaccine: The Controversial Story of Medicine's Greatest Lifesaver Arthur Allen

2008-05-17 "A timely, fair-minded and crisply written account."—New York Times Book Review Vaccine juxtaposes the stories of brilliant scientists with the industry's struggle to produce safe, effective, and profitable vaccines. It focuses on the role of military and medical authority in the introduction of vaccines and looks at why some parents have resisted this authority. Political and social intrigue have often accompanied vaccination—from the divisive introduction of smallpox inoculation in colonial Boston to the 9,000 lawsuits recently filed by parents convinced that vaccines caused their children's autism. With narrative grace and investigative journalism, Arthur Allen reveals a history illuminated by hope and shrouded by controversy, and he sheds new light on changing notions of health, risk, and the common good.

Fatal Michael Palmer 2003-09-30 From The Sisterhood, Michael Palmer's first New York Times bestseller, to The Patient, his ninth, reviewers have proclaimed him a master of medical suspense. Recognized around the world for original, topical, nail-biting suspense, emergency physician Palmer's work has been translated into more than thirty-five languages. Now he reaches controversial and startling new heights in a terrifying tale of cutting-edge microbiology, unbridled greed, and murder, where either knowing too little or trusting too much can be FATAL. In Chicago, a pregnant cafeteria worker suffering nothing more malevolent

than flulike symptoms begins hemorrhaging from every part of her body. In Boston, a brilliant musician, her face disfigured by an unknown disease, rapidly descends into a lethal paranoia. In Belinda, West Virginia, a miner suddenly goes berserk, causing a cave-in that kills two of his co-workers. Finding the link between these events could prove FATAL. Five years ago, internist and emergency specialist Matt Rutledge returned to his West Virginia home to marry his high-school sweetheart and open a practice. He also had a score to settle. His father died while working for the Belinda Coal and Coke Company, and Matt swore to expose the mine's health and safety violations. When his beloved Ginny succumbed to an unusual cancer, his campaign became even more bitterly personal. Now Matt has identified two bizarre cases of what he has dubbed the Belinda Syndrome--caused, he is certain, by the mine's careless disposal of toxic chemicals. All he needs is proof. Meanwhile, two women, unknown to one another, are drawn inexorably to Belinda, into Matt's life--and into mortal danger. Massachusetts coroner Nikki Solari comes to attend the funeral of her roommate, killed violently on a Boston street. Ellen Kroft, a retired schoolteacher from Maryland, seeks the remorseless killer who has threatened to destroy her and her family. Three strangers--Rutledge, Solari, and Kroft--each hold one piece of a puzzle they must solve, and solve quickly. If they don't, it will be far more than just their own lives

that are at risk. Michael Palmer has crafted a novel of breathtaking speed and medical intricacy where nothing is as it seems and one false step could be FATAL. The Procedure Peter Clement 2009-02-04 "Heartpounding suspense," hailed Entertainment Weekly of Peter Clement's first medical thriller, Lethal Practice. Now the former ER physician has done it again--combining his technical expertise with a page-burning plot to create a chillingly plausible novel of suspense. With authentic detail and a surgeon's precision, Clement captures the tense, electrifying atmosphere of a big city hospital turned into a flash point. For in Fatal Medicine,

one threat is more dangerous than contagion: the threat of human beings deciding who should live and who should die. . . . Death is a daily, sometimes hourly, occurrence at St. Vincent's Hospital in Buffalo, New York. Now, in his pressure cooker career, Dr. Earl Garnet has broken the cardinal rule of modern medicine: he publicly blames a powerful HMO for practicing "no-fault murder" in the death of an eighteen-month-old baby. The HMO swiftly strikes back, igniting a debilitating boycott of the hospital. But after several accidents nearly cost patients their lives, the true bloodletting begins. A doctor is found sprawled out in the parking lot, his throat cut ear to ear. Blamed for instigating the chaos, Earl Garnet knows that he faces more than a deadly power play. The doctor may have uncovered a conspiracy reaching from the halls of one of the nation's most influential HMOs to a small, experimental clinic in Mexico, where yet another of his patients went for treatment and disappeared. To find answers, Garnet must wade deep into the murky, surreal workings of today's health care industry. Smart, tough, crackling with suspense, and vivid in its hospital setting, this visionary novel instantly places Peter Clement in the distinguished company of Michael Palmer and Robin Cook. Make no mistake: *The Procedure* is the work of a first-rate physician and an absolutely brilliant storyteller.
