Triumph Stag Matthew Vale 2014-05-31 The Triumph Stag was a two-door, four-seat, luxury touring car, designed to be Triumph's flagship model for the 1970s. Styled by prolific designer Giovanni Michelotti, and engineered by Harry Webster and Spen King, the Stag had no direct competitors throughout its production life and was the blueprint for the many four-seat convertibles on the market today. It was in production from 1970 through to 1977, but suffered from a lack of development and gained a reputation for engine problems caused by poor cooling. Triumph Stag - An Enthusiast's Guide explores the history, design and development of the car, taking a special look at the Stag's unique Triumph V8 engine - and how Stag owners today have largely solved the cooling problems. It also covers owners' experiences, specialist modifications and improvements, and the car clubs that help the Stag remain one of the most popular classic cars in the UK. Superbly illustrated with 121 colour photographs.

MG/MGA Roy Crosier 2013-08-01 Judged by many to be the most attractive MG ever produced, the MGA is not

only good-looking, but also fun to drive, coping very well with modern traffic demands. In this book you will find advice on choosing the right model, and discussion about potential ownership costs. Practicality and comfort are considered, allowing you to assess suitability for touring, and issues of legality, originality and roadworthiness are also raised. This is a must-buy for anyone thinking of purchasing an MGA.

How to Rebuild Small-Block Ford Engines Tom Monroe 1987-01-01 If you have a small-block Ford, then you need this book! This detailed guide covers the step-by-step rebuilding process of the popular small-block Ford engine. Parts inspection, diagnosis, reconditioning, and assembly are outlined in simple text. Hundreds of photos, charts, and diagrams visually walk you through the entire rebuild. You'll be able to completely disassemble your engine, recondition the block and cylinder heads, then reassemble and install the engine in your vehicle. There's even a section on how to perform tune-ups to maximize performance and economy. Sections on parts interchanging will help you identify all parts and determine which ones can and can't be swapped. This is truly a "hands-on" book. Don't put off your project any longer. Start rebuilding your small-block Ford today!

Motor Sport William Boddy 1972

Everyday Modifications for Your Triumph Iain Ayre 2016-07-31 The books in the Everyday Modifications series are designed to guide classic car owners through the workshop skills needed to make their vehicles easier to use and enjoy. This book is concerned with improving the 4-cylinder Spitfire and Herald, and the 6-cylinder Vitesse and GT6, with engines ranging in size from 948cc to 1998cc. Classic car author and journalist Iain Ayre gives his hands-on advice on maintaining and modifying the Triumph Herald/Vitesse and Spitfire/GT6, covering both keeping them going and either subtly or dramatically improving them, with additional rescue options offered for Triumphs deemed economically terminal. The advice, based on decades of restoration and racing, covers improvements in power, handling, comfort and safety; period design faults isolated and remedied; electrics demystified, modernizing options discussed; six case studies; radical - as well as mild - modification options discussed. Superbly illustrated with over 250 colour photographs including rare period shots.

Lotus Europa - Colin Chapman's mid-engined masterpiece Matthew Vale 2022-04-13 The Lotus Europa was

Colin Chapman and Lotus's first mid-engined road car, and was produced from 1966 through to 1975. Originally designed to slot into the Lotus range below the Elan as a low cost replacement for the Lotus 7, the Europa eventually sat alongside the Elan and Plus 2 as a comparable sports car in its own right. Starting with the design philosophy behind the development of the Europa, this book provides detailed technical descriptions of all the major versions of the model, starting with the Renault-powered Series 1 through to the Lotus Twin Cam powered Special. It looks at the cars on the road, and the racing Type 47 derived from the road cars which competed in the small capacity Group 6 class, as well as featuring in historic racing today. With owners' impressions and interviews with ex-Lotus employees, the book provides a valuable insight into owning, running, and racing these iconic cars.

Lotus Europa Matthew Vale 2018-09-24 ?The Essential Guide to buying the Lotus Europa of your dreams, this book will guide you through all you need to know. Originally intended to be a cheap and basic Lotus Seven replacement, during its development the Lotus Europa morphed into a miniature supercar, described by Colin Chapman as a "working man's GT40," which sat alongside the Elan in the Lotus line-up. Its mid engined configuration gave it exceptional balance, and its handling and roadholding were second to none. Initially produced for export to Europe in late 1966, the Renault-powered car evolved into the Series 2 in 1968 when it was released to the UK and US markets, and, in its final iteration, gained the Lotus' own Twin Cam engine in 1971. Production ended in 1975 with around 9200 cars completed. This book has been written to provide the prospective owner with all the information they need to establish if the car is for them, and what to look for when viewing an example. All aspects of the cars are examined, including paperwork, mechanical issues, bodywork and interior with many photos of example cars to assist in the assessment of an individual car, and understand the implications of many of the common problems that a car can exhibit. The author is a Lotus enthusiast, and has been working on and writing about classic Lotuses for a number of years.
