Making Math Accessible to English Language Learners (Grades 9-12) r4Educated Solutions 2011-12-30 Making Math Accessible for English Language Learners provides practical classroom tips and suggestions to strengthen the quality of classroom instruction for teachers of mathematics. The tips and suggestions are based on research in practices and strategies that address the affective, linguistic, and cognitive needs of English language learners. Although this resource centers on teaching English language learners, many of the tips and suggestions benefit all students. Making Math Accessible for English Language Learners follows five case studies of composite student profiles throughout the book with opportunities for reflection to increase personal awareness of both the teacher's role and students' needs in the mathematics classroom, tasks to provide interaction with the content of the book, and hot tips for ideas applicable to real-world classroom situations.

Returns to Investment in University Training David A. Dodge 1972 From the Introduction: The purpose of this case study is to estimate an earnings determination model for Canadian chartered accountants, engineers and scientists, and on the basis of this model to estimate the returns to investment in some fields of higher education in Canada. These estimates will then be compared and contrasted with the results from other studies and some implications for Canadian education policy will be drawn. In pursuing this general purpose, the following specific issues will be considered: (1) the structure of earnings in the public and private sectors, and the differential effect of formal education on earnings in the two sectors; (2) the impact of work function on earnings and the relationship between formal education and work function; (3) the effect on earnings of ability as measured by high school marks, and the interaction of ability and formal education; and (4) the sensitivity of the estimates of earnings to the form of the earnings model.
