

# Resource Solutions Corona

Yeah, reviewing a books Resource Solutions Corona could ensue your near links listings. This is just one of the solutions for you to be successful. As understood, deed does not recommend that you have fabulous points.

Comprehending as with ease as bargain even more than extra will provide each success. bordering to, the proclamation as with ease as perception of this Resource Solutions Corona can be taken as capably as picked to act.

Handbook of Research on Challenges for Human Resource Management in the COVID-19 Era Figueiredo, Paula Cristina Nunes 2022-06-10 The importance of people in organizations has been growing in the organizational environment over the last decades. Digital transformation, artificial intelligence, and sustainability have already reinforced the role of people as a differentiating element for the success and survival of organizations. These phenomena alone are already challenging for people. There is a consensus that the world of work as we knew before the pandemic will not return. Human resource management (HRM) practices must prepare organizations for the future of work. The Handbook of Research on Challenges for Human Resource Management in the COVID-19 Era analyzes state-of-the-art HRM in a digital transformation context and investigates the factors that promote more learning and development dynamics in organizational contexts. It also evaluates the impact of HRM policies on individuals, organizations, and societies. Covering topics such as corporate social responsibility, job satisfaction, and electronic performance monitoring, this major reference work is a crucial resource for leaders from public and private companies, human resource professionals, specialists, students and educators of higher education, researchers, and academicians.

Libraries, Digital Information, and COVID David Baker 2021-07-02 COVID-19 is profoundly affecting the ways in which we live, learn, plan, and develop. What does COVID-19 mean for the future of digital information use and delivery, and for more traditional forms of library provision? Libraries, Digital Information, and COVID gives immediate and long-term solutions for librarians responding to the challenge of COVID-19. The book helps library leaders prepare for a post-COVID-19 world, giving guidance on developing sustainable solutions. The need for sustainable digital access has now become acute, and while offering a physical space will remain important, current events are likely to trigger a shift toward off-site working and study, making online

access to information more crucial. Libraries have already been providing access to digital information as a premium service. New forms and use of materials all serve to eliminate the need for direct contact in a physical space. Such spaces will come to be predicated on evolving systems of digital information, as critical needs are met by remote delivery of goods and services. Intensified financial pressure will also shape the future, with a reassessment of information and its commercial value. In response, there will be a massification of provision through increased cooperation and collaboration. These significant transitions are driving professionals to rethink and question their identities, values, and purpose. This book responds to these issues by examining the practicalities of running a library during and after the pandemic, answering questions such as: What do we know so far? How are institutions coping? Where are providers placing themselves on the digital/print and the remote/face-to-face continuums? This edited volume gives analysis and examples from around the globe on how libraries are managing to deliver access and services during COVID-19. This practical and thoughtful book provides a framework within which library directors and their staff can plan sustainable services and collections for an uncertain future. Focuses on the immediate practicalities of service provision under COVID-19 Considers longer-term strategic responses to emerging challenges Identifies key concerns and problems for librarians and library leaders Analyzes approaches to COVID-19 planning Presents and examines exemplars of best practice from around the world Offers practical models and a useful framework for the future

Human Resource Management in a Post COVID-19 World Hermann Troger 2021-03-01 This book presents a novel viewpoint in HR management: in addition to the macroeconomic factors (demographic development, industry 4.0, digitization, etc.) and its micro-political counterparts (shortage of skilled workers, an aging workforce, shortage of MINTs), personnel policy in the highly developed economic regions of the world can increasingly be seen from the third point of view, which is the ego-perspective. The complexity of the economic world 4.0 is manifesting itself for the employees in a working world of unlimited possibilities, offering almost limitless freedom of choice, especially for younger people. Due to this shift in the balance of power, the influence of the employers decreases and is often reduced to countering the pronounced self-confidence of the employees in asserting their expectations with corresponding company incentives. The author emphasizes that dealing with the challenges of this extremely fragile world of work - currently exacerbated by the COVID-19 pandemic - must by no means be left solely in the hands of overburdened personnel managers. The contribution of the line manager or direct superior is becoming increasingly important. And it is only through close and clearly defined cooperation between the two that the opportunity for effective human resources management lies. This book aims to illustrate this process of division of labor in the individual phases of personnel management.

Navigating Through the Crisis – A special Issue on the Covid 19 Crises Silvia L. Fotea 2022-01-01 By 2020, the global economy, led by the US – China duopoly, was experiencing the longest economic expansion on record. An economic slowdown was natural, but few experts expected a triple socioeconomic crisis: a crisis in the medical sector along with a crisis in the social realm and an economic crisis. This volume provides a multifaceted perspective on the current global crises, and its socioeconomic ramifications for individuals, businesses, organizations, governments, systems and developing countries.

Featuring selected papers from the 2020 Annual Griffiths School of Management and IT Conference (GSMAC), held in Oradea, Romania, this volume focuses on business, technological and ethical considerations in the process of navigating through crisis. The chapters explore diverse aspects of the sanitary crisis and its ramifications for countries and organizations. Finally, it provides diagnosis and recommendations for managerial practice in various industries impacted.

COVID-19 and Islamic Social Finance M. Kabir Hassan 2021-03-08 It is said that the COVID-19 pandemic has turned back the poverty clock. As such, there is a need to have social mechanisms put in place to provide relief to those who are affected in this regard. Islamic social finance consists of tools and institutions that could be used to alleviate poverty. This book explores the impact of COVID-19 on Islamic finance to better understand the effectiveness of Islamic social finance in helping those who have been affected by poverty overnight due to the halt in all major economic activities in the context of the pandemic. Since the struggle against poverty in each country will be different, the book attempts to shed light on the experiences of different countries by presenting successful models of Islamic social finance. The book first looks at poverty and COVID-19 before delving into the role of Islamic social financial institutions and how they have risen against COVID-19. The book concludes by examining the impact of COVID-19 on Islamic microfinance. This book is the first of its kind on the subject of COVID-19, and it intends to bridge the gap in the literature.

Global Perspectives on Change Management and Leadership in the Post-COVID-19 Era Al-Aali, Ebtihaj 2021-04-02 The COVID-19 pandemic is the largest global health crisis that we have faced since World War II. The greatest challenge for organizations was to establish a clear vision for a quick change that needs to be shared with employees in a way that is both understandable and inspiring. The year 2020 is a time of global change where leaders need to fulfill the change management role with decisions made efficiently and sustainably. To understand the impact of the pandemic on organizations, researchers will need to trace leadership development and change management in the Post-COVID-19 Era. These studies will help to present the different types of leadership roles, policies, and strategies for business transformation in the time of crisis. Global Perspectives on Change Management and Leadership in the Post-COVID-19 Era highlights the global perspectives of COVID-19's impact on change management and leadership and presents the lessons learned and opportunities afforded to promote new strategies and develop better practices within the field. The chapters report on case studies and real-life challenges faced by organizations in countries across the globe. This book covers important topics such as business sustainability, newfound challenges in the workplace, adaptive performance, success factors within organizations, corporate governance, and more. This is a valuable reference work for managers, executives, practitioners, researchers, students, academicians, stakeholders, business leaders, and anyone interested in leadership styles and the management of change during and after the COVID-19 pandemic.

Navigating beyond COVID-19 Recovery in the MENA Region OECD 2022-07-14 Navigating beyond COVID-19: Recovery in the MENA Region reflects on the impacts of the COVID-19 crisis on MENA countries and the potential changes it may bring to their reform agendas. It addresses not only the ongoing effects of the crisis, but also examines long-term consequences and identifies

emerging new trends.

Domain Adaptation and Representation Transfer, and Affordable Healthcare and AI for Resource Diverse Global Health Shadi Albarqouni 2021-09-23 This book constitutes the refereed proceedings of the Third MICCAI Workshop on Domain Adaptation and Representation Transfer, DART 2021, and the First MICCAI Workshop on Affordable Healthcare and AI for Resource Diverse Global Health, FAIR 2021, held in conjunction with MICCAI 2021, in September/October 2021. The workshops were planned to take place in Strasbourg, France, but were held virtually due to the COVID-19 pandemic. DART 2021 accepted 13 papers from the 21 submissions received. The workshop aims at creating a discussion forum to compare, evaluate, and discuss methodological advancements and ideas that can improve the applicability of machine learning (ML)/deep learning (DL) approaches to clinical setting by making them robust and consistent across different domains. For FAIR 2021, 10 papers from 17 submissions were accepted for publication. They focus on Image-to-Image Translation particularly for low-dose or low-resolution settings; Model Compactness and Compression; Domain Adaptation and Transfer Learning; Active, Continual and Meta-Learning.

Caring on the Frontline during COVID-19 Cecilia Vindrola-Padros 2022-02-24 This book examines the experiences of global healthcare workers during the COVID-19 pandemic. It shines a light on the experiences of healthcare workers during the pandemic, exploring their lived experiences of delivering care without losing sight of the emotional and symbolic nature of their work. Incorporating cutting-edge research from global experts in medical anthropology, medical sociology, medicine, psychology and nursing, it uniquely demonstrates the value of rapid qualitative research during infectious epidemics. Drawing on data collected during the COVID-19 pandemic, the book explores global healthcare policies and healthcare workers' experiences across 20 countries.

Educating Engineers for Future Industrial Revolutions Michael E. Auer 2021-03-11 This book contains papers in the fields of collaborative learning, new learning models and applications, project-based learning, game-based education, educational virtual environments, computer-aided language learning (CALL) and teaching best practices. We are currently witnessing a significant transformation in the development of education and especially post-secondary education. To face these challenges, higher education has to find innovative ways to quickly respond to these new needs. There is also pressure by the new situation in regard to the Covid pandemic. These were the aims connected with the 23rd International Conference on Interactive Collaborative Learning (ICL2020), which was held online by University of Technology Tallinn, Estonia from 23 to 25 September 2020. Since its beginning in 1998, this conference is devoted to new approaches in learning with a focus on collaborative learning. Nowadays the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy. In this way, we try to bridge the gap between 'pure' scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators,

researchers in pedagogy and learning theory, school teachers, learning industry, further and continuing education lecturers, etc.

The Consequences of COVID-19 on the Mental Well-being of Parents, Children and Adolescents Emma Sorbring 2022-07-25

2021 Global food policy report: Transforming food systems after COVID-19 International Food Policy Research Institute (IFPRI) 2021-04-13 The coronavirus pandemic has upended local, national, and global food systems, and put the Sustainable Development Goals further out of reach. But lessons from the world's response to the pandemic can help address future shocks and contribute to food system change. In the 2021 Global Food Policy Report, IFPRI researchers and other food policy experts explore the impacts of the pandemic and government policy responses, particularly for the poor and disadvantaged, and consider what this means for transforming our food systems to be healthy, resilient, efficient, sustainable, and inclusive. Chapters in the report look at balancing health and economic policies, promoting healthy diets and nutrition, strengthening social protection policies and inclusion, integrating natural resource protection into food sector policies, and enhancing the contribution of the private sector. Regional sections look at the diverse experiences around the world, and a special section on finance looks at innovative ways of funding food system transformation. Critical questions addressed include: - Who felt the greatest impact from falling incomes and food system disruptions caused by the pandemic? - How can countries find an effective balance among health, economic, and social policies in the face of crisis? - How did lockdowns affect diet quality and quantity in rural and urban areas? - Do national social protection systems such as cash transfers have the capacity to protect poor and vulnerable groups in a global crisis? - Can better integration of agricultural and ecosystem policies help prevent the next pandemic? - How did companies accelerate ongoing trends in digitalization and integration to keep food supply chains moving? - What different challenges did the pandemic spark in Asia, Africa, and Latin America and how did these regions respond?

Health Informatics and Technological Solutions for Coronavirus (COVID-19) Suman Lata Tripathi 2021-04-14 This reference text presents statistical information, causes and impacts of coronavirus on populations, economics, and environment. The text includes machine learning and deep learning techniques to understand exponential behavior as well as predicting the future reachability of the COVID-19 outbreak. It discusses important concepts including smart sensors for early stage diagnosis, diagnosis of COVID-19 using low power IoT-enabled systems, biomedical imaging and sensor fusion, and electronic solutions for diagnosis, monitoring, and treatment of diseases. Aimed at graduate students and professionals in the field of electrical engineering, electronics and communications engineering, biomedical engineering and nanomaterials, this book discusses fundamental aspects and latest research in the field of COVID-19 covers diagnostics techniques in detail provides overview of the symptoms, preventions, and treatments related to COVID-19 discusses android-based mobile applications helpful in spreading awareness of COVID-19

Routledge Handbook of Sport and COVID-19 Stephen Frawley 2022-08-24 This book examines the initial impact of the coronavirus pandemic on global sport and the varying consequences of the sport shutdown on all levels of society. It also considers the many lessons that have been learnt so that sport stakeholders can successfully adjust and operate under the "new

normal." Featuring authors, cases and examples from around the world, the book explores the impact of COVID-19 on sport at all levels, from community sport – where local clubs, gyms and development programmes had to find ways to survive with pitches closed and projects cancelled – to the major professional sport leagues and sport mega-events, with events postponed and teams playing in empty stadia. It considers the economic, social and developmental impacts of the pandemic, including physical, mental and social wellbeing, and looks at how key professional and community sport organizations have reacted to the crisis, reflecting on the lessons learnt and preparations for future pandemics and challenges of similar size and significance. With COVID-19 now endemic in the global population, this is an essential reference for anybody working in sport, from students and researchers to managers, policymakers and development officers.

Clinical Synopsis of COVID-19 Hemanshu Prabhakar 2020-10-05 Corona virus disease or COVID-19 or SARS-CoV-2 infection is the latest pandemic that has affected humans globally. The disease has manifested itself in several forms and is now the focus of research worldwide. This book covers all the clinical aspects of the novel corona virus disease, COVID-19, which is one of the most contagious diseases ever known. It includes topics related to basic sciences, such as the virology and pathophysiology of the SARS-CoV-2 disease. It includes chapters related to symptomatology of the disease and making diagnosis, preparation of the health care workers to deal with this global pandemic. The book includes chapters on anesthetic and intensive care management of COVID-19 disease victims as these topics are of vast importance. Additionally, it includes a chapter giving insight in to the ethical aspects of the issues raised regarding disposal of bodies of the victims, as this pandemic has taken many lives across the world. It includes a chapter on special considerations to patient population such as geriatrics, pediatrics and pregnant women. The book serves as a useful resource for practitioners and clinicians in any field of medicine. It is also relevant for residents, trainees, fellows pursuing their courses in emergency medicine, anesthesia and critical care as well as postgraduates and even undergraduates. The book will serve as a ready-reckoner and useful guide for physicians from varied specialties during their clinical practice.

Economic Outlook for Southeast Asia, China and India 2021 Reallocating Resources for Digitalisation OECD 2021-02-04 The 2021 edition of the Outlook addresses reallocation of resources to digitalisation in response to COVID-19, with special focuses on health, education and Industry 4.0. During the COVID-19 crisis, digitalisation has proved critical to ensuring the continuity of essential services.

SARS-CoV-2 Origin and COVID-19 Pandemic Across the Globe Vijay Kumar 2021-12-01 The current COVID-19 pandemic has infected more than 219 million people and killed more than 4.5 million people worldwide. It has also impacted the socioeconomic status of affected countries and led to the fastest development of vaccines in history. Over seven sections and seventeen chapters, this book comprehensively reviews numerous aspects of COVID-19, including epidemiology, zoonosis, drug development, telehealth, the effects of the virus on healthcare workers, the importance of architecture, and urbanism in

preventing future pandemics, and much more.

Handbook of Research on Digital Innovation and Networking in Post-COVID-19 Organizations Pego, Ana 2022-06-24

Businesses have had to face many challenges due to the COVID-19 pandemic; to survive in the changing landscape, they had to adapt quickly and implement new tactics and best practices to stay competitive. Networking is one of the many areas that looks vastly different in a post-pandemic world and companies must understand this change or risk falling behind. Further study is required to uncover the various difficulties and potential future directions of networking and innovation within the business landscape. The Handbook of Research on Digital Innovation and Networking in Post-COVID-19 Organizations provides a thorough overview of the ways in which organizations have had to change and adapt to the new business environments and considers how networking looks different in a post-COVID-19 world. Covering key topics such as organizational structures, consumer behavior, teleworking, and collaborations, this major reference work is ideal for managers, business owners, industry professionals, policymakers, researchers, scholars, academicians, practitioners, instructors, and students.

Emerging Applications of 3D Printing During CoVID 19 Pandemic Kamalpreet Sandhu 2021-07-29 This book presents various practical breakthroughs of 3D printing (3DP) technologies in developing different types of tool and gadgets to be used against COVID-19 pandemic. It presents multidisciplinary aspects of 3DP technology in social, medical, administration, and scientific areas. This book presents state-of-the-art applications of 3DP technology in the development of PPE, ventilators, respiratory equipments, and customized drugs. It provides a comprehensive collection of the technical notes, research designs, literature prospective, and clinical applications of 3DP technologies to effectively deal with the COVID-19 pandemic. This book will be beneficial for the medical professionals, pharmacists, manufacturing enterprises, and young scholars in understanding the real potential of 3DP technologies in aiding humans-based activities against the COVID-19 crisis. Having interdisciplinary applications in applied science, this book will also be useful for wide range of academicians, research scholars and industry stakeholders.

Covid-19: Biomedical Perspectives 2022-06-01 Covid-19: Biomedical Perspectives, Volume 50 in the Methods in Microbiology series highlights new advances in the field, with this new volume presenting interesting chapters written by an international board of authors. Individual chapters in this new release include Sensitive methods for detection of SARS-CoV-2 RNA, Treatment of COVID-19 using Chinese herbal medicine, Understanding how SARS-CoV-2 is evolving and its impact on COVID-19 animal models and vaccine evaluation, Methods in machine learning to identify COVID-19 literature, COVID-19 seasonal behavior and the mutational landscape of the SARS-CoV-2 virus, CRISPR use in Diagnosis and Therapy for COVID-19, and much more.

Provides the authority and expertise of leading contributors from an international board of authors Presents the latest release in Methods of Microbiology serials Updated release includes the latest information on Covid-19: Biomedical Perspectives

Older Adults and COVID-19 Edward Alan Miller 2021-05-13 The COVID-19 pandemic has impacted the lives of people throughout the world, either directly, due to exposure to the virus, or indirectly, due to measures taken to mitigate the virus' effects. Older adults have been particularly hard hit, dying in disproportionately higher numbers, especially in long-term care

facilities. Local, regional, and national government actions taken to mitigate the spread of COVID-19 have thus served, in part, to shield older adults from the virus, though not without adverse side effects, including increased social isolation, enhanced economic risk, revealed ageism, delayed medical treatment, and challenges getting basic needs met. This book explores the myriad ways in which the COVID-19 pandemic has affected older adults and their families, caregivers, and communities. It proposes policies and strategies for protecting and improving the lives of older people during the pandemic. It draws lessons for aging policy and practice more generally, given underlying challenges brought to the fore by government, provider, community, and individual responses to the pandemic. This book was originally published as a special issue of the Journal of Aging & Social Policy.

Future of Work and Business in Covid-19 Era Rabi Narayan Subudhi This proceedings volume explores the disruptive effect of COVID19 pandemic on business leaders and managers. It covers the sweeping changes experienced by all sectors of work and business along with core functional verticals. As organizations institutionalize lessons learned through trial and error, an effort is required to document these efforts. The volume is an amalgamation of papers presented papers at the International Management Conference, 2021 hosted at KIIT University, India in February 2021. The thrust of this conference was to gather a holistic picture of the lessons derived during the pandemic hardship. Selected papers provide readers with an idea of the new normal in various domains of management across industries and organizations. Research papers, from each functional areas of business management, give focus on experiences and best practices.

COVID-19 and a World of Ad Hoc Geographies Stanley D. Brunn 2022-10-17 This book provides an interdisciplinary overview of the causes and impacts of COVID-19 on populations, economies, politics, institutions and environments from all world regions. The book maps the causes, effects and impacts of the virus and describes the impact of the virus on among others health care, teaching and learning, travel, tourism, daily life, local and regional economies, media impacts, elections, and indigenous populations and much more. Contributions to this book come from the humanities, social and policy science disciplines as well as from emerging transdisciplinary fields including climate change, sustainability, health care and epidemiology, security, art, visualization, economic and social well-being, law and borderland studies. As such, this book will be a rich source of information to all those geographers, social scientists and urban and regional planners working in this field.

Consultants & Consulting Organizations Directory Cengage Gale 2009-05-08

AI-Powered IoT for COVID-19 Fadi Al-Turjman 2020-12-10 The Internet of Things (IoT) has made revolutionary advances in the utility grid as we know it. Among these advances, intelligent medical services are gaining much interest. The use of Artificial Intelligence (AI) is increasing day after day in fighting one of the most significant viruses, COVID-19. The purpose of this book is to present the detailed recent exploration of AI and IoT in the COVID-19 pandemic and similar applications. The integrated AI and IoT paradigm is widely used in most medical applications, as well as in sectors that deal with transacting data every day. This book can be used by computer science undergraduate and postgraduate students; researchers and practitioners; and city

administrators, policy makers, and government regulators. It presents a smart and up-to-date model for COVID-19 and similar applications. Novel architectural and medical use cases in the smart city project are the core aspects of this book. The wide variety of topics it presents offers readers multiple perspectives on a variety of disciplines. Prof. Dr. Fadi Al-Turjman received his PhD in computer science from Queen's University, Kingston, Ontario, Canada, in 2011. He is a full professor and research center director at Near East University, Nicosia, Cyprus.

2021 Global food policy report: Transforming food systems after COVID-19: Synopsis International Food Policy Research Institute (IFPRI) 2021-04-13 The coronavirus pandemic has upended local, national, and global food systems, and put the Sustainable Development Goals further out of reach. But lessons from the world's response to the pandemic can help address future shocks and contribute to food system change. In the 2021 Global Food Policy Report, IFPRI researchers and other food policy experts explore the impacts of the pandemic and government policy responses, particularly for the poor and disadvantaged, and consider what this means for transforming our food systems to be healthy, resilient, efficient, sustainable, and inclusive. Chapters in the report look at balancing health and economic policies, promoting healthy diets and nutrition, strengthening social protection policies and inclusion, integrating natural resource protection into food sector policies, and enhancing the contribution of the private sector. Regional sections look at the diverse experiences around the world, and a special section on finance looks at innovative ways of funding food system transformation. Critical questions addressed include: - Who felt the greatest impact from falling incomes and food system disruptions caused by the pandemic? - How can countries find an effective balance among health, economic, and social policies in the face of crisis? - How did lockdowns affect diet quality and quantity in rural and urban areas? - Do national social protection systems such as cash transfers have the capacity to protect poor and vulnerable groups in a global crisis? - Can better integration of agricultural and ecosystem policies help prevent the next pandemic? - How did companies accelerate ongoing trends in digitalization and integration to keep food supply chains moving? - What different challenges did the pandemic spark in Asia, Africa, and Latin America and how did these regions respond?

Managing Supply Chain Risk and Disruptions: Post COVID-19 Aravind Raj Sakthivel 2021-06-24 This book summarizes the effect of COVID-19 on the global supply chain. Eminent researchers, practitioners, and professors discuss the challenges faced by supply chain providers and supply chain strategies related to various global, retail, fast moving consumer goods, humanitarian, pharmaceutical, and agricultural supply chains. This book also suggests the resilient approach adopted by supply chain organizations for quick recovery and re-establishing their networks. This book helps the readers explore the pandemic's impact on the supply chain and rebuilding the same using suitable approaches.

Quality of Healthcare in the Aftermath of the COVID-19 Pandemic Moutzoglou, Anastasius 2021-12-10 The COVID-19 pandemic has put massive stress on healthcare professionals' formal training, their creed to do no harm, and the patient safety movement. COVID-19 affects all aspects of daily life and healthcare's organizational culture and values. Healthcare institutions experience absenteeism, change in commerce patterns, and interrupted supply/delivery in this context. It has also revealed the

extensive amounts of data needed for population health management, as well as the opportunities afforded by mainstreaming telehealth and virtual care capabilities, thus making the implementation of health IT essential in the post-pandemic era. *Quality of Healthcare in the Aftermath of the COVID-19 Pandemic* clarifies how healthcare professionals might provide their services differently than treating a patient through its vicinity with multiple providers. It examines the notion that healthcare education requires a pack of healthcare workers from varied educational backgrounds and training levels for the nuances of a disease. Covering topics such as blockchain technology, power density analysis, and supply chain, this book is a valuable resource for undergraduate and extended degree program students, graduate students of healthcare quality and health services management, healthcare managers, health professionals, researchers, professors, and academicians.

*Digital Innovation for Healthcare in COVID-19 Pandemic: Strategies and Solutions* Patricia Ordóñez de Pablos 2022-03-25  
*Digital Innovation for Healthcare in COVID-19 Pandemic: Strategies and Solutions* provides comprehensive knowledge and insights on the application of information technologies in the healthcare sector, sharing experiences from leading researchers and academics from around the world. The book presents innovative ideas, solutions and examples to deal with one of the major challenges of the world, a global problem with health, economic and political dimensions. Advanced information technologies can play a key role in solving problems generated by the COVID-19 outbreak. The book addresses how science, technology and innovation can provide advances and solutions to new global health challenges. This is a valuable resource for researchers, clinicians, healthcare workers, policymakers and members of the biomedical field who are interested in learning how digital technologies can help us avoid and solve global disease dissemination. Presents real-world cases with experiences of applications of healthcare solutions during the pandemic of COVID-19 Discusses new approaches, theories and tools developed during an unprecedented health situation and how they can be used afterwards Encompasses information on preparedness for future outbreaks to make less costly and more effective healthcare responses to crises

*Energy Transition, Climate Change, and COVID-19* Fateh Belaïd 2021-12-06 This volume analyzes the impacts of the COVID-19 pandemic on energy transition and climate change from an economic perspective. Since its emergence in early 2020, the COVID-19 pandemic has had a powerful effect on multiple facets of the global economy. The unknown scope and duration of the pandemic and its associated economic shocks have made energy security and the process of clean energy transition highly unpredictable. To combat this, this edited volume presents a wide range of theoretical and empirical research at the nexus of the COVID-19 pandemic and energy, resource, and environmental economics. Chapters focus on four major themes: the impact of crises on energy security, the role of resilient energy systems in society, the challenges of clean energy transition, and economic impacts of COVID-19 on climate change. Providing rigorous analysis of an evolving situation that will continue to impact the global energy market, this volume will be of interest to researchers and students of energy economics, environmental economics, and resource economics as well as policy professionals involved in climate change and energy transition.

*Unconventional Water Resources*

Systemic Inequality, Sustainability and COVID-19 Seela Aladuwaka 2022-05-30 Systemic Inequality, Sustainability and COVID-19 provides an opportunity to engage in a critical dialog on the consequences and interactions of COVID-19 with social inequalities and environment management.

The Kyoto Post-COVID Manifesto For Global Economics Stephen Hill

Challenges in Economic Policy, Business and Management in the COVID-19 Era Anna Ujwary-Gil 2022-01-01 The COVID-19 pandemic has made it necessary to redefine the most significant challenges faced by individual economies and society today. It contributed to the change of contemporary social, technological and economic trends, the effects of which will indeed be the subject of many scientific studies in the coming years. As the pandemic progresses, it promotes reflection and summaries of the consequences of behaviors or omissions in each country. One of them is a synthetic presentation of ten lessons from the pandemic (Gorynia, 2021), which the professor accurately diagnoses in the economic context: 1) the pandemic as a non-economic (sanitary-medical) shock that caused the economic, social and political crisis; 2) the pandemic as a "black swan", an unpredictable threat of high species gravity, but requiring anticipation to minimize its harmful effects in the future; 3) determining the causes of the appearance of the virus determines different preventive actions for future threats; 4) resilience as the foundation of long-term economic efficiency; 5) the set of measures to counteract the harmful effects of a pandemic should not be unified but adapted to the specificity of the facilities it is to affect; 6) the world economy as a system of vessels connected with its positive and negative consequences; 7) the pandemic highlighted the role of coordination of international cooperation; the shortcomings of globalization must be overcome by fairly sharing the positive fruits of international cooperation and resilience aimed at diversifying supplies; 8) economic policy pursued by individual states with a view to preventing the effects of the economic crisis caused by a pandemic cannot be voluntary; 9) the pandemic has sharpened the perception of the shortcomings of contemporary economic, social and political systems and prompts the questioning of certain pillars of the market economy (e.g., homo oeconomicus, individual and global rationality, private and state property, canons of monetary, fiscal, budgetary or industrial policy); 10) the pandemic increases the pressure on systemic and holistic thinking taking into account green economic development, saving energy, water and other resources, using renewable energy sources, avoiding wastage of resources, paying attention to social inequalities in the world, regions and countries, solving poverty problems, and social exclusion. This monograph is partially a response to the in-depth issues covered in these lessons. The authors of individual chapters challenge contemporary topics relating to the COVID-19 pandemic, industry and inter-organizational cooperation, pro-environmental, resilient, and innovative organizations. The monograph consists of three parts. The first part (PART 1) covers an overview of very recent research, considering the impact of COVID-19 on the economy, industries, and business. The article by Anna Ujwary-Gil and Bianka Godlewska-Dziobo deals with, among others, the issues relating to pandemic impacts on the slowdown in the functioning of the construction, electric automotive, and water industries. Also, it affects the tourist industry, where countries are

starting to pay attention to the resource-saving green economy and problems of professional exclusion in the pandemic era. In another article, Maria Czech refers to the influence of public debt on the volatility of spreads during the COVID-19 pandemic. This research is part of the study on the use of sovereign credit default swap spreads to assess a country's credit risk, which may be distorted in a pandemic period. It is undisputed that the COVID-19 pandemic has a global dimension. The crisis resulting from disorders such as in value chains has caused industry to slow down. The Czech luxury fashion industry is no exception. As Radka MacGregor Pelikánová points out, COVID-19 has turned out to be a threat to its development.. Leading Czech luxury fashion companies withdrew to a passive role and felt the negative consequences of the pandemic. As the Author points out, few have engaged in corporate social responsibility and showed ingenuity, which increases their chances of survival in the future. In other studies, Tereza Horáková and Kateřina Maršíková identified factors influencing the environment of effective knowledge exchange in SMEs, which in the era of hybrid work during COVID-19, is particularly important. The second part of the monograph (PART 2) includes two studies on the photovoltaic cell industry in China from the perspective of comparative and intra-industry advantage. As a significant player in the global trade scene and various value chains, China is a fascinating subject of research undertaken by Paweł Brusilo and Bogusława Drelich-Skulska. The results of the first article demonstrate the success of the Chinese industry in terms of growth potential, competitiveness, and development opportunities thanks to effective state support and favorable market forces. As the authors point out, the Chinese solar cell industry has not been studied so far in the context of comparative advantage and the new structural economy. The results show the way for other countries to consider or develop innovative industries, such as renewable energy and solar energy. In the second article, Paweł Brusilo examines the topic of the Belt and Road Initiative in the context of the Chinese photovoltaic cell industry, energy transition policy, identification of modern intra-industry trade patterns and opportunities for this industry, which is characterized by significant state interventionism. The considerations in this article may inspire EU countries to deepen economic and trade cooperation in the export and import of solar cells with China. On the other hand, Joanna Kurowska-Pysz has undertaken the analysis of the cooperation conditions within the innovative processes of representatives of science, business, the legislative, and economic environment cooperating on the capital market. The Author focused on the motivators, barriers, but also the search for an effective form of development of intersectoral cooperation enabling the exchange of knowledge and experience, learning, including the flow of personnel between sectors, joint organization of conferences, seminars, training, and implementation of research projects constituting the basis of innovative processes, or the diagnosis of network relationships. The model proposed by the Author will surely inspire other researchers. The third part of the monograph (PART 3) includes articles referring, inter alia, to the pro-environmental organizational culture of enterprises. Katarzyna Piwowar-Sulej, as an advocate of this valuable orientation today, has shown that organizations are interested in developing pro-ecological behavior and are aware of their impact on the natural environment. The article is in line with the global trend focused on the sustainable, ecological, and green economy enterprises operating in this trend, not only because of COVID-19. Taking action to develop a pro-ecological

organizational culture, taking care of the natural environment is not only a moral and ethical requirement but also an obligation for the future generation. This part also includes an article by Piotr Tomszys and Bartosz Grucza, who present an inspiring model of organizational resilience and an attempt to operationalize it. The organizational resilience model proposed by the Authors is in line with the growing interest in the analyzes and measurement of the enterprises' resilience. The conceptualization and measurement of economic resilience can inspire other researchers to further research in this area. The COVID-19 pandemic, as an unpredictable and destructive shock, might be a unique opportunity to verify the developed model, as the authors point out. The last article deals with the issue of innovative management and its measurement based on a proprietary tool developed by Magdalena Gorzelany-Dziadkowiec. The considerations undertaken by the Author are a reliable starting point for further research concerning the impact of COVID-19 on the organization's functioning, the development of innovative management, changes in work processes, and interpersonal relations in the era of increasingly dominant digital technology and skills to use it. The editors profoundly thank all the Authors for their valuable contribution to this monograph and cooperation in its co-creation. We address our grateful thanks to all the Reviewers for their insightful evaluation and high standards of their work. These special thanks go to (in alphabetical order) Barbara B?aszczyk Institute of Economics, Polish Academy of Sciences; Justyna Bugaj, Jagiellonian University; Anna Fornalczyk, COMPER Fornalczyk and Wspólnicy; Marta Gancarczyk, Jagiellonian University; Anna Maria Lis, Gda?sk University of Technology; Andrzej Lis, Nicolaus Copernicus University; Mieczys?aw Morawski, Warsaw University of Technology; Pawe? Pisany, Institute of Economics, Polish Academy of Sciences; Natalia R. Potoczek, Institute of Economics, Polish Academy of Sciences. We also thank Pawe? Japo? for his thorough proofreading of this monograph.

Coronavirus Disease (COVID-19): Psychological, Behavioral, Interpersonal Effects, and Clinical Implications for Health Systems  
Gianluca Castelnuovo 2022-08-30

Turnock's Public Health: What It Is and How It Works Guthrie S. Birkhead 2020-09-28 Using a straightforward systems approach, Turnock's Public Health: What It Is and How It Works explores the inner workings of the complex, modern U.S. public health system—what it is, what it does, how it works, and why it is important. Divided into two parts, Part I of the text focuses on the key elements of public health practice in 21st Century America, while Part II offers case studies designed to emphasize what public health is and how it works in practice. Collectively, this text gives students an understanding of the key concepts underlying public health as a system and social enterprise while enabling them to practice their knowledge with real-life public health problems, programs, and initiatives. The Seventh Edition introduces the concept of “Public Health 3.0”, with its new set of recommendations for updated public health practice in the 21st century and forms a unifying thread through the first six chapters of the book. A new appendix addresses COVID-19.

Handbook of Research on Library Response to the COVID-19 Pandemic Holland, Barbara 2021-03-19 Since the spread of COVID-19, conferences have been canceled, schools have closed, and libraries around the world are facing difficult decisions on which services to offer and how, ranging from minimal restrictions to full closures. Depending on the country, state, or city, a

government may have a different approach, sometimes ordering the closure of all institutions, others indicating that it's business as usual, and others simply leaving decisions up to library directors. All libraries worldwide have been affected, from university libraries to public library systems and national libraries. Throughout these closures, libraries continue to provide services to their communities, which has led to an emerging area of research on library services, new emerging technologies, and the advancements made to libraries during this global health crisis. The Handbook of Research on Library Response to the COVID-19 Pandemic consists of chapters that contain essential library services and emerging research and technology that evolved and/or has continued during the COVID-19 pandemic, as well as the challenges and opportunities that have been undertaken as a result. The chapters provide in-depth research, surveys, and information on areas such as remote working, machine learning, data management, and the role of information during COVID-19. This book is a valuable reference tool for practitioners, stakeholders, researchers, academicians, and students who are interested in the current state of libraries during a pandemic and the future outlook.

Strengthening Health System and Community Responses to Confront COVID-19 Pandemic in Resource-Scarce Settings Bach Tran 2022-08-02

The Science and Politics of Covid-19 Michel Claessens 2021-06-28 This book is a fresh and readable account of the Covid-19 pandemic and how scientists and medical doctors are helping governments to manage the crisis. The book contains interviews and exchanges with dozens of scientists, doctors, experts, government representatives, and journalists. Why do some of the most scientifically advanced countries have the highest Covid-19 mortality? During the pandemic, the research community has been at the heart of—and actor in—a global scandal. Why has science failed? With the help of numerous testimonies from China, France, the UK and the USA in particular, the book provides an insider's view on this major crisis. Although the governments of these countries based their Covid-19 strategy on science, scientists failed to have a decisive influence on decision-makers—except in China—, which created genuine “time bombs.” The accelerated development of vaccines does not erase past months' errors. The crisis led to the development of “science politics” at an unprecedented rate. More worryingly, experts themselves acknowledge that they did not rise to the challenge. Covid-19 also highlighted the weakness of democratic regimes and the power of technocapitalism. Countries pulled down their blinds, locked their doors, and promoted national approaches rather than international cooperation. The author proposes to set up an international framework on health risk to co-construct decision-making. He advocates political distancing in order to put the basics first: develop science, fight ignorance.

Special Report: Saudi Arabian Leadership Through COVID-19 Peter Howson This publication was compiled over the course of several months of interviews in Saudi Arabia after the COVID-19 outbreak. The pace of internal reform in the Kingdom has been significant over the past three-five years, and in many cases the old, low-tech, and sclerotic public service that had so long been a feature of Saudi Arabia was vastly changed when the pandemic arrived in Riyadh. Nonetheless, this virus has challenged the

modernizing bureaucracy in the desert at a magnitude that no other event, be it war or reform, has even come close to doing.
