Fires on the Border Rosemary Hennessy 2013-12-01 The history of the maquiladoras has been punctuated by workers' organized resistance to abysmal working and living conditions. Over years of involvement in such movements, Rosemary Hennessy was struck by an elusive but significant feature of these struggles: the extent to which organizing is driven by attachments of affection and antagonism, belief, betrayal, and identification. What precisely is the "affective" dimension of organizing for justice? Are affects and emotions the same? And how can their value be calculated? Fires on the Border takes up these questions of labor and community organizing—its "affect-culture"—on Mexico's northern border from the early 1970s to the present day. Through these campaigns, Hennessy illuminates the attachments and identifications that motivate people to act on behalf of one another and that bind them to a common cause. The book's unsettling, even jarring, narratives bring together empirical and ethnographic accounts—of specific campaigns, the untold stories of gay and lesbian organizers, love and utopian longing—in concert with materialist theories of affect and the critical good sense of Mexican organizers. Teasing out the integration of affect-culture in economic relations and cultural processes, Hennessy provides evidence that sexuality and gender as strong affect attractors are incorporated in the harvesting of surplus labor. At the same time, workers' testimonies confirm that the capacities for bonding and affective attachment, far from being entirely at the service of capital, are at the very heart of social movements devoted to sustaining life.

e-Commerce The Staff of the Wall Street Journal 2001-01-17 Several times a year, The Wall Street Journal publishes Special Reports about e-commerce and technology. With this segment of the economy generating billions of dollars in revenue and market capitalization, it's no wonder that this is one of the most popular features of both the print and interactive versions of the Journal. Here, in E-Commerce, is the best of these Special Reports. Here are articles that profile the challenges facing "old-economy" businesses like car manufacturers as they go online, and uncover the Internet's dirty little secret: porn, the most profitable industry on the Web. Here are explorations of the many new business models for working on the Web, from "eating your own dog food" to show customers how well your technology works, to ensuring that customer service reigns supreme even in the New Economy -- and articles that highlight how even in a digital world, things like pricing structures and the difficulties of starting a business remain constant. Here are interviews with e-commerce pioneers, like the founders of Yahoo!, as well as articles that tell the tales of those who have taken the e-commerce plunge, like Merrill Lynch CEO David H. Komansky and Curran Catalog founder Jeff Curran. And a series of stories shows "How Technology Has Changed the Way We..." do just about everything, from staying in touch to doing homework to having babies. Collected and presented here for the first time in e-book format, E-Commerce is a searchable, portable, and valuable resource from the award-winning staff of The Wall Street Journal.
